Kota Sukabumi, Jawa Barat

Informatics Engineering graduate specializing in Fullstack and Frontend Web Development. Experienced in building responsive applications using React.js, Express.js, Laravel, and REST APIs. Skilled in translating system requirements into clean, functional code and scalable architecture. Ready to drive technical solutions as a Software Engineer or Frontend Developer.

Project Experiences

Universitas Pasundan - **Bandung** Nov 2025 - Jun 2026

Final Projects

- Authored SRS documentation and UML diagrams (Use Case, Sequence, Class) for system architecture.
- Developed responsive SPA frontend using React.js for customer ordering and admin dashboard.
- Built RESTful APIs with Express.js and designed MySQL database schema for transaction management.
- Implemented real-time transaction tracking, invoice generation, and automated sales analytics.

Juara Vibe Coding - **Jakarta** May 2026 - Jun 2026

Fullstack Developer

- Engineered REventS, an AI-powered event management platform supporting dual-mode switching between Event Organizers and Audiences.
- Integrated Gemini AI (via Google AI Studio) to build automated event concept generators (Rev Copilot) and interactive AI assistant chatbots (REvas'st).
- Developed core operational modules, including real-time analytics dashboards, RSVP/ticket tracking, and automated certificate generation.
- Built responsive full-stack interfaces to streamline end-to-end event planning and audience engagement.

Universitas Pasundan - **Bandung** May 2025 - Dec 2025

Textbook Author

- Co-authored an ISBN-registered Machine Learning textbook for university-level curriculum.
- Wrote core chapters covering fundamental Artificial Intelligence, Machine Learning, and Data Science concepts.
- Designed practical case studies, practice questions, and conceptual diagrams to enhance learning.
- Managed end-to-end publishing workflow, from literature research to final editorial review.

PT Aneheim Nimbus Universal - **Bandung** Aug 2025 - Oct 2025

System Analyst Intern

- Conducted requirement gathering and authored SRS documentation for a midwifery clinical practice logging and assessment platform.
- Designed UML diagrams (Use Case, Activity, Sequence) mapping student examination data entry and preceptor evaluation workflows.
- Defined functional specifications for real-time clinical data input, preceptor scoring matrices, and feedback verification systems.

Jenjang Pendidikan

Universitas Pasundan - **Bandung** Sep 2022 - Jul 2026

Bachelor of Informatics Engineering, 3.64/4.00

- Capstone Project - System Analyst E-Commerce Platform
- Capstone Project - UI/UX Designer E-Waste Management
- Capstone Project - UI/UX Designer BookStore App
- Assistant Laboratory For Object-Oriented Systems
- Secretary Of Google Developer Group On Campus Universitas Pasundan
- Event Manager Of Google Developer Student Club Universitas Pasundan
- Secretary PSDM Departement of Informatics Engineering Student Association
- Secretary Publication, Design & Documentation Division of PKKMB 2023

SMA Negeri 1 Kota SUkabumi - **Sukabumi** Jun 2019 - Jul 2022

Senior High School, Majored in Natural Sciences

- General Chairperson — Youth Health Cadres
- Head of Talent & Creative Division — Islamic Student Association
- Official Student Guide & Liaison — National Healthy School Competition (LSS)

Pengalaman organisasi

Google Developer Group on Campus Universitas Pasundan - **Bandung** Nov 2024 - Apr 2025

Secretary

- Managed end-to-end organizational administration, official documentation, and internal correspondence for the GDGoC community.
- Coordinated tech events, workshops, and developer initiatives to foster technology education and skill-building on campus.
- Facilitated cross-team collaboration and maintained relationships with external partners and sponsors.

Informatics Engineering Student Association - **Bandung** Oct 2024 - Feb 2025

Secretary of PSDM Department

- Handled departmental administration and progress tracking for Human Resource Development (PSDM) initiatives.
- Spearheaded member development programs, including structured recruitment, technical bootcamps, and leadership workshops.
- Established mentoring systems and performance evaluation frameworks to improve organizational capabilities.

Google Developer Student Club Universitas Pasundan - **Bandung** Aug 2023 - Jun 2024

Event Manager

- Planned and executed large-scale tech events, including hands-on workshops, seminars, and Google Study Jams.
- Managed end-to-end event logistics, speaker coordination, and timeline execution to ensure seamless delivery.
- Drove participant outreach and engagement, attracting attendees both from within and outside the university.

Informatics Department Orientation Committee - **Bandung** Sep 2023 - Dec 2023

Publication, Design & Documentation Staff

- Designed creative promotional assets, social media graphics, and visual branding for the orientation series.
- Managed content distribution strategies across digital channels to boost participant awareness and engagement.
- Documented official orientation activities and managed multimedia archives for committee publications.

Keterampilan, Prestasi & pengalaman lain

- **Soft Skills**: Problem Solving, Teamwork, Creative Communication, Growth Mindset, Leadership, Public Speaking.
- **Hard Skills**: Java, Laravel, PHP, HTML&CSS, Javascript, ExpressJs, MS Office, Google Workspace, Design(Figma, Canva), Voice Over, Video Editing, Narration
- **Achievements**: 1st Winner — Departmental Creative Video Competition | 7th Place & National Finalist — National UI/UX Design Competition
